Practical information

Parking and load-in

The parking lot is located on the north side of the Mitt i Stan building. It is easy to load in equipment from the parking lot into the hall, without having to use stairs or lifts. The doors open from the inside, so you need to take the main entrance first and ask the sound technician or hall keeper to open the doors for you. Hotel employees do not work at Frans Henrikson's Hall.

Stage

Usually the hall floor is used as stage. There is a balcony in the hall, so the stage rarely needs to be elevated. There are however 10 stage elements with the dimensions 1x2 metres, which can be built into an additional stage if needed, request offer. The stage is 40 cm high.

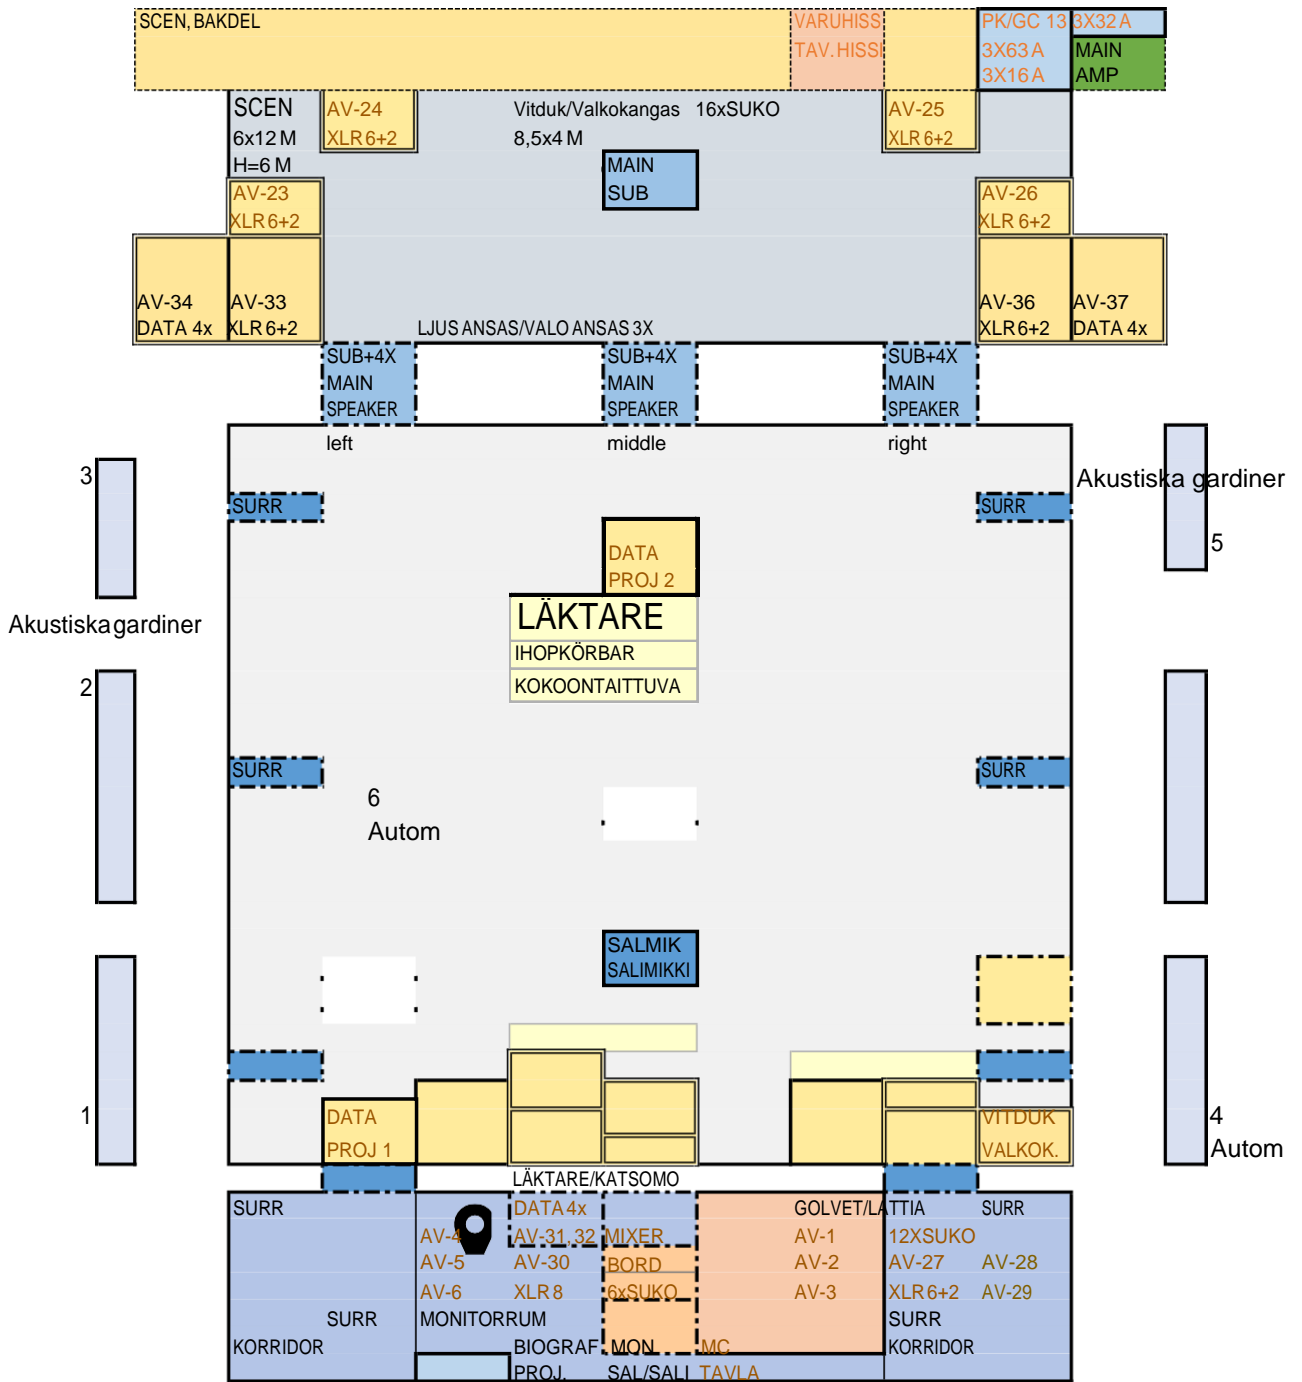

Emergency exit

There are two emergency exits straight through to the parking lot on the north side of Mitt i Stan. The parking lot is used as an assembly place during a fire alarm.

Backstage

A greenroom for preparation and breaks is included. Dressing rooms and make up rooms with private bathrooms and washing facilities are also at your disposal.
